

The Impact of Spatial Data and Geospatial Technology in Advancing and Fostering Age-friendly Communities

**Gerontech and Innovation Expo Summit
21-24 November 2024**

Dr Jane Barratt
Global Advisor, International Federation on Ageing
Independent Consultant

Technology Is An Enabler, Not A Solution

Agenda

- Ageing and functional ability
- Geoinformatics for improving population health
- New frontiers – the potential to add life to years through geoinformatics
- Collective call to action

Ageing and Functional Ability

Health challenges

Uncertain

- climate change
- urbanization
- globalization
- infectious diseases
- non-infectious diseases
- drug resistant microbes

Certain

- population ageing
- increased prevalence of non communicable diseases e.g. diabetes, cancer, heart disease

UN Decade of
Healthy Ageing:
Plan of Action

2021–2030
